#harmony

the concepts of symmetry, proportion and harmony are commonly associated with Pythagoras and his belief in the "harmony of the spheres". He theorized that the planets and the stars moved according to mathematical equations which corresponded to musical notes and produced a symphony. The term harmony derives from the Greek "αρμονία" [armonia] which means "joint, agreement, concord" and was often used for all the arts in general. In Ancient Greece it defined the combination of contrasting elements: a higher and a lower note. ♫

#utopia

#ecstasy

to be or to stand outside oneself; removal of oneself elsewhere. The term derived from the Greek "εκστασις" [ekstasis] used by Ancient Greek philosophers to denote a heightened state of pleasure or level of ecstasy that may have been ignored by others. Related to emotional rapture or spiritual ecstasy, it may apply to intense sexual experience or an extraordinary sense of spiritual or personal connectivity to others.

#dialogue

is a written or spoken conversational exchange between two or more people and a literary and theatrical form that depicts such an exchange. As a narrative, philosophical or didactic device, it is chiefly associated in the West with the Socratic dialogue as developed by Plato. The term dialogue stems from the Greek "διαλογος" [dialogos] meaning conversation. ♫

#utopia

#utopia

an imaginary perfect society especially in its social, political and moral aspects. The term "utopia" was coined from the Greek by Sir Thomas More when describing a fictional island society in the Atlantic Ocean. "Utopia" [juˈtoʊpi.ə] is a combination of the Greek words "ou" [ou] and "topos" [topos] that means "no place" and generally denotes a non-existent society. Today the word has a broader connotation usually referring to a non-existent society that is better and preferable to an actual, contemporary one.

MEMORY GAME

Match 40 quotes of Greek philosophers or thoughts of 40 influential personalities. You will enjoy playing and be inspired. Cards are laid out in a grid face down, and players take turns flipping pairs of cards over. At each turn, each player will first turn one card over, then a second. If the two cards match, the player scores one point, the two cards are removed from the game, and the player gets another turn. If they do not match, the cards are turned back over. The object is to match more pairs of cards than the opposing player. (One point is scored for each matched pair, and the player with the highest score after all cards have been matched wins.) There are 40 unique pairs of cards, for a total of 80 cards total in each game.

DIALOGUE GAME

Just take a few moments to breath, relax and think about your life and the impact of what "thinking" has in our world today. Try it by playing the dialogue game alone, with a partner, friend or relative. Ask the questions and give your answers by bringing out your deepest thoughts. We are all so busy living, but it will only take a few seconds to think and answer each question. It will surprise you to see what is hidden deep inside you. Play Two dialogue games, 20 questions to start thinking and 20 questions to keep thinking.
